Slowly, slowly, slowly . . . that's the way the sloth moves. Slowly, it eats and then, slowly, it falls asleep. "What strange kind of creature is this?" the other animals wonder. Why doesn't it run or fly or play or hunt like the rest of us? "Why are you so slow?" the howler monkey inquires. But the sloth doesn't answer any questions until the jaguar asks, "Why are you so lazy?" Anyone who has ever felt too busy will appreciate the sloth's peaceful lifestyle and realize that it's okay to take time to enjoy life. Eric Carle's dazzling collage illustrations introduce readers to the exotic beauty of the Amazon rain forest and the many unusual animals living there.

Challenged by the other jungle animals for its seemingly lazy ways, a sloth living in a tree explains the many advantages of his slow and peaceful existence.

As all the animals of the forest race past him throughout the day and night, they become curious as to why sloth just hangs in his one spot all the time, yet after asking him, the other animals begin to see the wisdom in sloth's simple outlook on the world.

Carle is one of the most beloved illustrators of children's books. This retrospective is more than just an appreciation of his art, however. The book also contains an insightful autobiography illustrated with personal photographs, an anecdotal essay by his longtime editor, a photographic essay on how Carle creates his collages, and writings by Carle and his colleagues. Still, it is the artwork in the oversize volume that seizes the imagination. More than 60 of his full-color collage pictures are handsomely reproduced and serve as a statement of Carle's impressive talent. - Booklist

Free Access in January 2019 There has been an increasing interest in the emerging subfield within linguistics and anthropology often referred to as community-based research (Himmelman 1998, Rice 2010, Crippen and Robinson 2013, among others). This volume brings together perspectives from academics, community members, and those that find themselves in both academia and the community. The volume begins with a working definition of the notions of community-based research as a practice and illustrates how such notions shifted, without abandoning the outlined tenets within the working definition, as the chapters developed to include notions of community-based research as a tool and ideology as well as an orientation. Each of the 17 chapters represents a case-study with the first five including discussions of broader issues and theoretical perspectives while exploring community-based research as an emerging subfield within linguistics. The case-studies comprise work from the Americas, Australia, India, Europe, and Africa. The goal of the volume is to build on the emerging literature and practices in the field to arrive at a better understanding of how community-based research is theorized and practiced in a variety of environments, communities, and cultures.

This is a story of an artist who, from his earliest years, draws. The artist draws a star! Then, the tree, house, flowers, clouds, rainbow, and night. In drawing, he discovers not only his art, but his life. Holding on to his star, he creates a world of light and possibility. With his brilliant collage, poignant and powerful in its simplicity, Eric Carle creates an unforgettable story that celebrates imagination and the artist in us all.
