pieces Hands-on, easy-to-follow exercises help you perfect your skills Packed with practical guidance on everything from obtaining supplies to working safely, Stained Glass For Dummies is the perfect guide for beginner and novice artists and artisans who want to try a hand at this centuries-old art.

This is the third book in the series Creating Art for All Ages. The series takes students on an interdisciplinary cross content journey. Each book provides experiences in language arts, social studies, math and art as the students investigate ancient and modern civilizations. Industry and Imagination in Ancient and Modern Civilizations is the third book of the series and examines the generations of the Industrial Revolution, society during WWI and WWII, Modern and Contemporary times. During the era of the Industrial Revolution, the role of the artist transformed as the patronage changed and advancements in photography were able to portray likenesses. The artist sought new avenues by using art as an expressive tool. As time progressed, artistic expression navigated the art into innovative, imaginative and unique styles. Art became whatever the artist intended it to be.

Cell Biology: A Laboratory Handbook, Volume 3 is a handbook on cell biology and covers topics ranging from transfer of macromolecules and small molecules to cloning of embryos, transgenics, and gene targeting. Cell-free extracts, permeabilized cell systems, and expression systems are also discussed, along with proteins. Comprised of 58 chapters, this volume begins with a detailed account of microinjection of RNA, DNA, and proteins into somatic cells, followed by an analysis of computer-automated capillary microinjection of macromolecules into living cells. The

reader is then introduced to syringe loading as a method for inserting macromolecules into cells in suspension; electroporation of cells; and the use of liposomes in drug targeting. Subsequent chapters focus on the cloning of rabbit embryos by nuclear transplantation; gene targeting by homologous recombination in embryonic stem cells; production and isolation of recombinant viruses; and gel electrophoresis. This book will be of interest to geneticists and molecular biologists.

From the world leader in fascinating facts and amusing true stories comes a book about how things are made...and you should be glad that you don't have to make them yourself. For more than 25 years, Uncle John's Bathroom Reader has helped you learn amazing things you didn't know (and amazing things you didn't know you didn't know). Now, Uncle John will show you how to do things you didn't know how to do...and probably shouldn't ever, ever, ever actually do. It's Uncle John's How to Toilet Train Your Cat A new approach to survival guides and how-to books, this book provides step-by-step instructions for how to make commonplace items. If you're expecting "how to make your own beef jerky," think again. This book shows how the "sausage is made"—literally. Read all about:

- How to make gelatin from scratch (by boiling hooves) •
- How to make high fructose corn syrup •
- How to make glue the "old-fashioned" way (from animal hides) •
- How to build a nuclear reactor •
- How to embalm a corpse •
- How to make prison wine •
- How to turn a cow into a hamburger •
- How to make a diamond •
- How to make electricity •
- How to remove your own appendix •

And lots, lots more!
