Freakonomics is a ground-breaking collaboration between Levitt and Stephen J. Dubner, an award-winning author and journalist. They usually begin with a mountain of data and a simple, unasked question. Some of these questions concern life-and-death issues; others have an admittedly freakish quality.

Freakonomics Questions and Answers. The Question and Answer section for Freakonomics is a great resource to ask questions, find answers, and discuss the novel.

Avec Freakonomics, leur premier livre (Folio actuel numéro 132), Levitt et Dubner ont transformé notre regard sur le monde en appliquant les méthodes de l'économie aux petites bizarreries de la vie quotidienne. SuperFreakonomics aborde une nouvelle série de questions aussi insolites les unes que les autres. La méthode économique n'est ici ni une simple discipline universitaire ni une stricte explication mathématique de l'"économie", mais un instrument dont il faut se servir pour décrire comment nous prenons des décisions : c'est le mariage de la méthode économique et de la curiosité iconoclaste. Finalement, il ressort de toutes ces démonstrations une redoutable évidence : les êtres humains, que l'économie traite en sujets rationnels et calculateurs, ne font qu'obéir aux incitations.

Freakonomics lived on the New York Times bestseller list for an astonishing two years. Now authors Steven D. Levitt and Stephen J. Dubner return with more iconoclastic insights and observations in SuperFreakonomics—the long awaited follow-up to their New York Times Notable blockbuster. Based on revolutionary research and original studies SuperFreakonomics promises to once again challenge our view of the way the world really works.

Steven Levitt, the original rogue economist, and Stephen Dubner have spent four years uncovering the hidden side of even more controversial subjects, from terrorism to shark attacks, cable TV to hurricanes. The result is Superfreakonomics. It reveals, among other things: - Why you are more likely to be killed walking drunk than driving drunk - How a prostitute is more likely to sleep with a policeman than be arrested by one - Why terrorists might be easier to track down than you would imagine - How a sex change could boost your salary Because sometimes the most superfreaky solution is the simplest.

The New York Times bestselling Freakonomics was a worldwide sensation. Now, Steven D. Levitt and Stephen J. Dubner return with SuperFreakonomics, and fans and newcomers alike will find that the "freakquel" is even bolder, funnier, and more surprising than the first. SuperFreakonomics challenges the way we think all over again, exploring the hidden side of everything with such questions as: How is a street prostitute like a department store Santa? Who adds more value: a pimp or a Realtor? What do hurricanes, heart attacks, and highway deaths have in common? Did TV cause a rise in crime? Can eating kangaroo meat save the planet? Whether investigating a solution to global warming or explaining why the price of oral sex has fallen so drastically, Levitt and Dubner show the world for what it really is—good, bad, ugly, and, in the final analysis, superfreaky.

Whether investigating a solution to global warming or explaining why the price of oral sex has fallen so drastically, Levitt and Dubner mix smart thinking and great storytelling to show how people respond to incentives.

Steven Levitt and Stephen Dubner single-handedly showed the world that applying counter-intuitive approaches to everyday problems can bear surprising results. Think Like a Freak will take readers further inside this special thought process, revealing a new way of approaching the decisions we make, the plans we create and the morals we choose. It answers the question on the lips of everyone who's read the previous books: How can I apply these ideas to my life? How do I make smarter, harder and better decisions? How can I truly think like a freak? With short, highly entertaining insights running the gamut from "The Upside of Quitting" to "How to Succeed with No Talent," Think Like a Freak is poised to radically alter the way we think about all aspects of life on this planet.

In celebration of the 10th anniversary of the landmark book Freakonomics comes this curated collection from the most readable economics blog in the universe. It's the perfect solution for the millions of readers who love all things Freakonomics. Surprising and erudite, eloquent and witty, When to Rob a Bank demonstrates the brilliance that has made the Freakonomics guys an international sensation, with more than 7 million books sold in 40 languages, and 150 million downloads of their Freakonomics Radio podcast. When Freakonomics was first published, the authors started a blog—and they've kept it up. The writing is more casual, more personal, even more outlandish than in their books. In When to Rob a Bank, they ask a host of typically off-center questions: Why don't flight attendants get tipped? If you were a terrorist, how would you attack? And why does KFC always run out of fried chicken? Over the past decade, Steven D. Levitt and Stephen J. Dubner have published more than 8,000 blog posts on Freakonomics.com. Many of them, they freely admit, were rubbish. But now they've gone through and picked the best of the best. You'll discover what people lie about, and why; the best way to cut gun deaths; why it might be time for a sex tax; and, yes, when to rob a bank. (Short answer: never; the ROI is terrible.) You'll also learn a great deal about Levitt and Dubner's own quirks and passions, from gambling and golf to backgammon and the abolition of the penny.
