Swift is a general-purpose, multi-paradigm, compiled programming language developed by Apple Inc. and the open-source community, first released in 2014. Swift was developed as a replacement for Apple's earlier programming language Objective-C, as Objective-C had been largely unchanged since the early 1980s and lacked modern language features. Swift works with Apple's Cocoa and Cocoa Touch ...

3. The author talks up how elegant functional programming can be, and then uses a half dozen third party libraries in order to create a extremely simple todo list app. It would have been much preferable to show how to elegantly make a functional swift app before throwing in all that additional baggage.
