Business Legislation for Management is meant for students of business management, who need to be familiar with business laws and company law in their future role as managers. The book explains these laws in a simple and succinct manner, making the students sufficiently aware of the scope of these laws so that they are able to operate their businesses within their legal confines. The book approaches the subject in a logical way, so that even a student with no legal background is able to understand it. The book is the outcome of the authors' long experience of teaching business law and company law to students pursuing undergraduate and postgraduate courses at the University of Delhi. This, in fact, has made it possible for them to write on law without the use of legal jargon; thus ensuring that even the most complicated provisions of various legislations are explained in an easily comprehensible manner. This new edition of the book has been thoroughly updated, revised and expanded keeping in mind the requirements of diverse syllabuses of various universities. New in this Edition • Laws of Intellectual Property Rights that include Patents Act, 1970, Copyright Act, 1957, Trade Marks Act, 1999, and Designs Act, 2000 • Foreign Exchange Management Act, 1999 • Competition Act, 2002 Salient Features • Unfolds intricate points of law to solve intriguing questions • Elucidates practical implications of law through a large number of illustrations

Academic Paper from the year 2017 in the subject Law - Media, Multimedia Law, Copyright, grade: 75%. . course: Intellectual Property Law, language: English, abstract: The very rapid emergence of industrialization, globalization and technicalities formed a great basis for the growth of technology and the rise of this computer age. Electronic commerce is one of its products seeing that it is a major economic significance of the 21st century. Thus, internet is a new culture that has undoubtedly come to stay and while it remains, changes our own style. The wide range of activities performed with the use of internet has proven to outweigh the old-fashioned way of doing same activities. The creators of computer must not have imagined how super useful their creation stands globally today. The internet has a great deal of impact on business and its practices. local markets will be mostly replaced by global markets. This change will lead to new business models and of course, the birth of E-commerce. One of such E-transactions includes Internet contract, which is E-contract. In conclusion, the paper establishes that in all ramifications, electronic contracts have been positive enough to human living that it is now a do-without in our day to day living. At the same time, its venom cannot be overlooked. Like a wild fire, if appropriate measures are not taken, it will consume even the most advanced of men, and the very literate. Privacy issues are my most dreaded concerns. The authenticity to protect information is so uncertain and yet, so unavoidable in most cases. Laws should be appropriately reformed to suit into the already coming ugly face of electronic contracts and e-commerce in general. Consumer protection should be the springboard to foster these laws as the persons on the other hand will not have much to lose. While determining this, global expansion of technology should not be hampered or subdued as to becoming inaccessible for the common man.
