 The T56 military turboprop and its commercial version, the 501-D are the leading large turboprop engines globally by number of units sold and have over 230 million operating hours. The T56 is a robust, reliable turboprop engine operating in military and civil aircraft worldwide.

~~T56 — Rolls-Royce~~
 The 501-M62B had a 13-stage compressor based on the 501-M24 demonstrator engine, which was a fixed single-shaft engine with an increased overall pressure ratio and a variable-geometry compressor, and it had an annular combustor based on the T56-A-18 and other development programs. The turbine was derived from the fixed single-shaft T56, which ...

 Rolls-Royce - T56/501-D After 50 years of supporting the Rolls-Royce T56/501 family of engines, StandardAero has the largest and most diverse group of T56/501 customers in the industry. Our experience and innovation have delivered market-leading technical developments and product enhancements.

~~StandardAero -> Engines -> Rolls-Royce -> T56/501-D~~
 The T56 military turboprop and its commercial equivalent, the 501-D, are two of the leading large turboprop engines on the market based on the number of units sold. In total the engine has accumulated in excess of 200 million flight operating hours.

~~Rolls-Royce T56 Turboprop Engine | PowerWeb~~
 The commercial version of the T56, the 501, powered the Lockheed Electra L-188, which entered service with Eastern Airlines in 1959. With some models rated in excess of 5,000 horsepower, the T56 has powered several other large military and commercial aircraft, such as the Lockheed P-3, Convair 580, Grumman C-2 and E-2, and Aerospace Lines Super Guppy.

~~Allison T56 A 1 (501-D13) Turboprop Engine, Cutaway ...~~
 T56 / Model 501 The Allison T56 is a single shaft, modular design military turboprop with a 14-stage axial flow compressor driven by a four-stage turbine. It was originally developed by the Allison Engine Company for the Lockheed C-130 transport entering production in 1954. It is now produced under Rolls-Royce which acquired Allison in 1995.

~~Allison T56 | Military Wiki | Fandom~~
 Rolls-Royce T56 Turpoprop Engine | PowerWeb The engine's commercial version, the T56 501-D, is the world-leading large turboprop engine. The T56 is a single shaft, modular design, turboprop engine. The gearbox has two stages of gear reduction, features a propeller brake and is connected to the power section by a torque-meter assembly.

~~Allison T56 Engine Manual~~
 The fuel system of the Allison 501/T56 engine that powers the Hercules aircraft is provided with effective, automatic controls that keep engine temperatures within safe limits over a wide variety of operating conditions. Lockheed SERVICE NEWS V14N13 As good as this system is, however, it was not designed to work alone.
