Two great grandmasters combine their talents in a masterly analysis of attack and defense in the middle game: attacking the king, defense, pawn structure, and much more. Introduction by Harry Golombek.

One of the hardest tasks competitive chess-players face is the development of an opening repertoire suited to their own style of play. In view of the limited time most players have to study, an economic and well designed repertoire is essential, but it is sometimes difficult to know where to start. In this book, translated by Ken Neat, Grandmaster Gufeld makes the job easier by providing an ideal framework for a practical opening repertoire, specifically tailored for those who relish attacking play.

Historians have portrayed British participation in World War I as a series of tragic debacles, with lines of men mown down by machine guns, with untried new military technology, and incompetent generals who threw their troops into improvised and unsuccessful attacks. In this book a renowned military historian studies the evolution of British infantry tactics during the war and challenges this interpretation, showing that while the British army's plans and technologies failed persistently during the improvised first half of the war, the army gradually improved its technique, technology, and, eventually, its' self-assurance. By the time of its successful sustained offensive in the fall of 1918, says Paddy Griffith, the British army was demonstrating a battlefield skill and mobility that would rarely be surpassed even during World War II. Evaluating the great gap that exists between theory and practice, between textbook and bullet-swept mudfield, Griffith argues that many battles were carefully planned to exploit advanced tactics and to avoid casualties, but that breakthrough was simply impossible under the conditions of the time. According to Griffith, the British were already masters of "storm troop tactics" by the end of 1916, and in several important respects were further ahead than the Germans would be even in 1918. In fields such as the timing and orchestration of all-arms assaults, predicted artillery fire, "Commando-style" trench raiding, the use of light machine guns, or the barrage fire of heavy machine guns, the British led the world. Although British generals were not military geniuses, says Griffith, they should at least be credited for effectively inventing much of the twentieth-century's art of war.
