Years War. This was followed ten years later by his second great success at the Battle of Poitiers. The subsequent Treaty of Bretigny established the rights of the King of England to hold his domains in France without paying homage to the King of France. In this hugely-acclaimed military history Colonel Burne re-establishes the reputation of Edward III as a grand master of strategy, whose personal hand lay behind the success of Crecy. He convincingly demonstrates that much of the credit for Crecy and Poitiers should be given to Edward and less to his son, the Black Prince, than is traditionally the case. With his vigorous and exciting style, Colonel Burne has chronicled for the general reader as well as for the military enthusiast, one of the most exceptional wars in which England has ever been engaged. This book firmly restores the Crecy campaign to its rightful place near the pinnacle of British military history. A most important book a work of original research, written by a master of his subject A model of how history should be written, packed with accurate information and common sense. Sir Arthur Bryant in The Sunday Times

It began with voices--St. Michael, St. Catherine, and St. Margaret speaking to an ordinary farmer's daughter. Inspired to aid the future King Charles VII, whose right to the throne had been denied by the English in the Hundred Years War, Joan of Arc made her journey clad in male attire. Theologians testified to the veracity of her divine claims, and she was furnished with a host of troops. But how did she achieve the military feats that made her a legend? Stephen W. Richey offers a unique look at this remarkable woman. Joan of Arc rapidly matured into a true battle commander who spoke forcefully in war councils, made decisions, and gave orders that were obeyed--resulting in a stunning series of victories for her army. She achieved this

feat by virtue of her unschooled but intuitive genius for war, a charismatic personality that inspired her soldiers to heroic feats, and her ability to exploit a unique set of lucky circumstances.

Henry V's stunning victory at Agincourt was a pivotal battle of the Hundred Years War, reviving England's military fortunes and changing forever the course of European warfare. In this exciting and readable account Colonel Burne recreates the years leading up to Agincourt and its bitter aftermath. He also puts the battle in the perspective of the other important, yet less well known, engagements of the war such as the battles of Verneuil and Fresnay. As with the battles, so with its commanders: Henry V is known to all, but Colonel Burne gives rightful honour to Talbot, Salisbury, Bedford, Chandos and many others. On the French side he details the parts played by Bertrand du Guesclin and of course Joan of Arc. Colonel Burne's outstanding reconstruction of the war is written for layman and historian alike and conveys the drama that Agincourt and its heroes have always so vividly evoked. This new edition of a classic text includes a new introduction by Anne Curry, the world's leading authority on the battle of Agincourt.

Three hundred and fifty-one men were executed by British Army firing-squads between September 1914 and November 1920. By far the greatest number were shot for desertion in the face of the enemy. Controversial even at the time, these executions of soldiers amid the horrors of the Western Front continue to haunt the history of war.
