economic good that has full or substantial fungibility: that is, the market treats instances of the good as equivalent or nearly so with no regard to who produced them. The price of a commodity good is typically determined as a function of its market as a whole: well-established physical commodities have actively traded spot and derivative markets. The wide availability of commodities typically leads to smaller profit margins and diminishes the importance of facto

COMMODITY A commodity is a basic good, material, or product that is produced in very large quantities and is usually sold in raw or only partly processed form. The most common commodities are essential agricultural products such as wheat, sugar, rubber, and coffee and basic mineral-derived products like copper, tin, or silver.
