An interesting and informative book exploring leadership and the exercise of power in business organizations.

As true leaders know, creating a vision is the way to stir things up, get people thinking differently, and excite them about the future of the organization. But creating and implementing that vision is no easy task, and it comes much more naturally to some than others. Daren Hancott defines what leaders do and what they are in this guide to leadership-sharing insights and strategies that anyone can use to boost their own leadership skills along the way. He asks questions such as: -Why would you want to be a leader? -What's the difference between leaders and managers? -What role do leaders play in changing an organization's culture? -How can leaders overcome resistance to change? The theme throughout is that leaders are made, not born, and while leadership is difficult and complex, anyone can learn to be a leader. This guide is an essential resource for students, educators, entrepreneurs, and working professionals who want to join the ranks of great leaders.

Internationally recognized leadership expert John C. Maxwell teaches readers how to shift their leadership to keep innovating, improving, and influencing others in today's fast-paced world. Change is so rapid today that leaders must do much more than stay the course to be successful. If they aren't nimble and ready to adapt, they won't survive. The key is to learn how to leadshift. In *Leadershift*, John C. Maxwell helps leaders gain the ability and willingness to make leadership changes that will positively enhance their organizational and personal growth. He does this by sharing the eleven shifts he made over the course of his long and successful leadership career. Each shift changed his trajectory and set him up for new and exciting achievements, ultimately strengthening and sustaining his leadership abilities and making him the admired leadership expert he is today. Among those leadshifts are the Adaptive Shift from Plan A to Option A, the Production Shift from Ladder Climbing to Ladder Building, and the Influence Shift from Positional Authority to Moral Authority. Maxwell gives specific guidance to readers about how to make these shifts in their own lives. Each one requires them to change the way they think, act, and ultimately lead so they can be successful in a world that never remains the same.

Scholarly Essay from the year 2012 in the subject Business economics - Personnel and Organisation, grade: none, language: English, abstract: This paper is aimed at providing the students of management with a holistic view of modern leadership research in the field of management sciences. It introduces the students to the basic understanding of leadership in a general way. Next, leadership in relation to business economics, organization and governance is explained. Then, we discuss on different categories of leadership theories. These are: Great Man Theories, Trait Theories, Contingency Theories, Management Theories (with special reference to Transactional Leadership Theory), Relationship Theories (with special reference to Transformational Leadership Theory, Situational Theories, Participative Theories (with special reference to Path-Goal Theory), Behavioral Theories (with special reference to Managerial Grid Model) and Leadership Member Exchange Theory. The individual theories, which are especially important and have attention from the academicians, have been separately mentioned under their respective categories. The paper ends with a suitable conclusion and an authentic reference list.

"This book provides a compendium of terms, definitions and explanations of concepts, processes and acronyms that reflect the growing trends, issues, and applications of technology project management"--Provided by publisher.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Leadership and how to be an effective leader, this work attempts to expand on the trait leadership theory. Leadership is an integral part of the workplace today and therefore understanding and developing academic theories that can be practically applied, aids personal development. The issue of

leadership and the critical evaluation of the major attributes of effective leadership have been of considerable theoretical interest for over a century. The current study was therefore underpinned by seven major concepts that attempt to explain the qualities of leadership

Use this helpful book to learn about the leadership tools to fuel success, grow your team, and become the visionary you were meant to be. True leadership isn't a matter of having a certain job or title. In fact, being chosen for a position is only the first of the five levels every effective leader achieves. To become more than "the boss" people follow only because they are required to, you have to master the ability to invest in people and inspire them. To grow further in your role, you must achieve results and build a team that produces. You need to help people to develop their skills to become leaders in their own right. And if you have the skill and dedication, you can reach the pinnacle of leadership—where experience will allow you to extend your influence beyond your immediate reach and time for the benefit of others. The 5 Levels of Leadership are: 1. Position—People follow because they have to. 2. Permission—People follow because they want to. 3. Production—People follow because of what you have done for the organization. 4. People Development—People follow because of what you have done for them personally. 5. Pinnacle—People follow because of who you are and what you represent. Through humor, in-depth insight, and examples, internationally recognized leadership expert John C. Maxwell describes each of these stages of leadership. He shows you how to master each level and rise up to the next to become a more influential, respected, and successful leader.
