Waste management laws govern the transport, treatment, storage, and disposal of all manner of waste, including municipal solid waste, hazardous waste, and nuclear waste, among many other types. Waste laws are generally designed to minimize or eliminate the uncontrolled dispersal of waste materials into the environment in a manner that may cause ecological or biological harm, and include laws designed to reduce the generation of waste and promote or mandate waste recycling.

The Waste Management Law – Lexology

The primary conclusion drawn is that waste management law developed in common law systems tends to be formulated and administered based on particular cases, with principles drawn from the “sum” of the specifics. This can be contrasted with civil law systems which are more likely to decide individual cases based on overarching principles.

The Development of Waste Management Law

The Environment Protection Act 1990 (including Duty of Care regulations) - This is the main legislation governing clinical waste disposal. It states that all producers of waste have a Duty of Care to ensure the correct management of waste, including documenting the transfer of waste and ensuring waste is handled correctly.

Waste Legislation | Initial UK

Your local authority has a legal duty under the Environmental Protection Act 1990 to collect household waste. Waste that is not recycled is normally collected on a weekly basis on days set by the authority. Many also offer weekly or fortnightly recycling collection.

The management of waste in South Africa has been based on the principles of the waste management hierarchy (Figure 13.1) from early waste policy (DEAT 2000) and entrenched in recent waste legislation. The adoption of the hierarchy has been in the policy since 2009, but the management of waste has not necessarily followed the hierarchal approach.

The Law of Waste Management by Pocklington, David N ---

The Waste Management Law began the regulation of systematic waste streams through basic principles in waste management practices, from reduction to disposal of waste. This law also encouraged recycling and resource conservation through a deposit-refund system and a landfill post-closure management system.
