Key Takeaways: Skeletal System The skeletal

Read Book The Skeletal System Assignment Detailed Outline In The

system gives the body shape and form and helps to both protect and support the entire organism. Bone, cartilage, tendons, joints, ligaments and other connective tissues compose the skeletal system. The two main types of bone tissue are compact (hard and dense) and cancellous (spongy and flexible) tissue.

~~Skeletal System Function and Components~~

The skeletal system consists of bones, teeth, joints, and structures that connect bones to other bones or muscles (e.g., ligaments, tendons, and cartilage). Most animals,

Read Book The Skeletal System Assignment Detailed Outline In The

excluding insects, have internal skeletal systems that serve a variety of functions, including support, protection, storage, and healing.
