The Vaccine-Friendly Plan is the latest book about vaccines that claims to offer a “safe and effective approach to immunity and health.” What’s the problem with it? In addition to the fact that there doesn’t seem to be any evidence in the book to support that any of its ideas are indeed safe or effective, the book pushes just about every anti-vaccine talking point out there today.

Since 2008, Dr. Paul and the team at Integrative Pediatrics LLC have been using the plan outlined below. Combining this vaccine plan with exclusive breastfeeding, eating a diet of real food, getting enough vitamin D, exercising, and avoiding toxins like acetaminophen, aspartame, and glyphosate, the children in his practice have experienced superior health, and a significantly lower rate of autism (0 in 1176) than the national average, which is 1 in 45.

The Centers for Disease Control and Prevention (CDC) required all states and territories to turn in an interim plan for COVID-19 vaccine distribution on Oct. 16, 2020. These plans are living documents and will change over time as we learn more about the vaccines and figure out the most equitable way to protect people.
