wars has begun. Extreme weather is breeding banditry, humanitarian crisis, and state failure. In *Tropic of Chaos*, investigative journalist Christian Parenti travels along the front lines of this gathering catastrophe--the belt of economically and politically battered postcolonial nations and war zones girding the planet's midlatitudes. Here he finds failed states amid climatic disasters. But he also reveals the unsettling presence of Western military forces and explains how they see an opportunity in the crisis to prepare for open-ended global counterinsurgency. Parenti argues that this incipient "climate fascism"--a political hardening of wealthy states-- is bound to fail. The struggling states of the developing world cannot be allowed to collapse, as they will take other nations down as well. Instead, we must work to

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and

his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all

twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of

great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. “ Some of the key concepts discerned in the study, ” comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people. ” Perhaps, but who can afford to ignore these findings?

From the #1 New York Times bestselling author of *The Other Boleyn Girl* comes the final book of the extraordinary Wideacre trilogy as the heir to the great estate comes home at last. her beloved sister, Dandy, risks everything for their future. Alone, Meridon follows the urgings of her dream, riding in the moonlight past the rusted gates, up the winding drive to a house—clutching the golden clasp of the necklace that was her birthright—home at last to Wideacre. The lost heir of one of England ' s great estates would take her place as its mistress... Meridon is a rich, impassioned tapestry of a young woman ' s journey from dreams to glittering drawing rooms and elaborate deceits, from a simple hope to a deep and fulfilling love. Set in the savage contrasts of Georgian England—a time alive with treachery, grandeur, and intrigue—Meridon is Philippa Gregory ' s masterwork.

It all began when, in one of the biggest news stories of the 19th century, Sir John Franklin and his ships the Erebus and the Terror disappeared while attempting to locate the fabled Northwest Passage. At the request of Franklin ' s wife, Lady Jane, the first mission set out from England in hopes of finding him; many others followed in its wake, none successful. Among these was the Resolute, the finest vessel in Queen Victoria ' s Navy. But in 1854 it became locked in Arctic ice and was abandoned by its captain. A year later, a Connecticut whaler discovered it 1,200 miles away drifting and deserted, a 600-ton ghost ship. He and his small crew boarded the Resolute, and steered it through a ferocious hurricane back to New London, Connecticut. The United States government then
