The Elite head, as you can see, is an entirely different story. Press the clamp closed with light finger pressure (remember, you're holding a 30-40+ pound bike in your other hand!), and the clamp's luscious red lips gingerly close on the frame. A twist or two of the well-designed spinner knob seals the deal, and the bike is held firmly in place.

The Road to San Donato is an adventurous travel memoir of an American father and son tracing their Italian heritage by bicycle. With only the bare essentials on their backs, author Robert Cocuzzo and his sixty-four-year-old father, Stephen, embark on a torturous 425-mile ride from Florence, Italy, to San Donato Val di Comino, an ancient village hidden in the Apennine mountains from which their family emigrated a hundred years earlier. After getting lost, beaten down, and very nearly stranded, when they finally reach the village the Cocuzzos discover so much more than their own family story. For many Jews in the 1940s, the road to San Donato was one of exile; during World War II, dozens were interned in the village. When the Nazis came to their door off to death camps, however, many of the villagers went to heroic lengths to save their lives. Walking and pedaling through this history, Robert Cocuzzo is determined to learn the role his family played at the time. The Road to San Donato is a story of fathers and sons, discovering lost "cousins," valorous history, and the challenge and exhilaration of traveling by bicycle.

Coach Joe Friel is the most trusted name in endurance sports coaching, and his Cyclist's Training Bible is the most comprehensive and reliable training resource ever written for cyclists. This new edition of the bestselling book includes all of the latest advances in training and technology. Using this book, cyclists can create a comprehensive, self-coached training plan that is both scientifically proven and shaped around their personal goals. Friel empowers athletes with every detail they need to consider when planning a season, lining up a week of workouts, or preparing to race. This fourth edition includes extensive revisions on the specifics of how to train and what to eat. Friel explains how cyclists can: best gauge intensity with power meters and other new training technology to maximize form and fitness and reduce fatigue; more knowledgeably and accurately make changes to their annual training plan over the course of a season; dramatically build muscular endurance with strength training; improve body composition and recovery with smarter nutrition. With more case studies to draw from and multiple contingency plans for those times when training doesn't progress as planned, The Cyclist's Training Bible continues to be the definitive guide to optimal cycling performance.
