Prior research finds value relevance of accounting amounts— particularly earnings—has declined, attributes the decline to the rise of this new economy, and concludes accounting information has lost its relevance. IWe consider value relevance of a larger set of accounting amounts, including amounts that could reflect information about intangible assets, growth opportunities, and alternative firm

performance measures, which are important in the new economy.

Evolution in Value Relevance of Accounting Information
Since under historical cost accounting, fixed assets are valued at their original purchase value (less depreciation), their net book value may differ significantly from their true worth to the entity. Users of the financial statements may therefore underestimate the real worth of business assets such as land and buildings.
