Since independence, the West African sub-region has been an arena for a number of large-scale conflicts and civil wars, as well as simmering and low-intensity uprisings. Contrary to perceptions, West Africa in its post-independence history has experienced fewer conflict events and fatalities from conflict than the other sub-regions on the continent. The turn of the millennium has witnessed the recession of large-

scale and conventional conflict, and it has ushered in new and emerging threats. The specters of religious extremism, maritime piracy, and narcotics trafficking threaten to undermine some of the progress achieved in recent years. *The Challenge of Stability and Security in West Africa* critically examines the key drivers of conflict and violence, and the way in which they impact the countries of the sub-region. In addition to emerging threats, these drivers include the challenges of youth inclusion, migration, sub-regional imbalances, and extractives, as well as challenges related to the fragility of political institutions and managing the competition for power, reform of the security sector, and weakness of institutions related to land management. The book explores how the sub-region, under the auspices

of the regional organization ECOWAS, has become a pioneer on the continent in terms of addressing regional challenges. The Challenge of Stability and Security in West Africa also identifies key lessons in the dynamics of resilience in the face of political violence and civil war drawn from CÃ te d'Ivoire, Liberia, and Sierra Leone, that can be useful for countries around the world in similar situations. It incorporates knowledge and findings from leading experts and provides insights from academics and development practitioners. Finally, the book identifies possible policy and programmatic responses and directions for policy dialogue at the national and international levels.

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes

and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book 's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. " This extremely well-written

and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as “ the diploma disease † ? takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog. † ? Angela W. Little, Professor Emerita, Institute of Education, University College London “ This book is very well structured and written and draws on the authors ’ remarkable global knowledge across countries and histories.

It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings. † ? Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning “ I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations. † ? Ghana is on a strong trajectory toward solidifying its middle income status. Today, more children than at any time in the history of Ghana have access to basic and secondary education. Over the past decade, incidence of extreme poverty has been cut in half amid strong economic growth. Ghana's recent achievements point to the possibility of more fully realizing the human potential of all individuals and of the country. Basic Education beyond the Millennium Development Goals in Ghana argues that realizing this potential requires a redoubling of efforts to reach the poorest half of Ghanaian children with quality basic

education. At present, system-wide disparities in education service delivery and highly inequitable allocation of resources has led to unfair educational outcomes. These disparities create a “missing middle” in terms of learning outcomes: although a small number of children perform well on numeracy and literacy assessments, more than 60% of 6th graders do not attain proficiency levels. Several recent initiatives point to the possibility of accelerating Ghana's progress toward quality basic education for all: they improve equitable resource allocation, strengthen social protection, and provide additional academic support to improve learning outcomes. By outlining key challenges and promising practices, *Basic Education beyond the Millennium Development Goals in Ghana* seeks to stimulate

everyday experience and expertise to develop new ways of teaching and learning that involve students in intellectually challenging tasks. This book tells the stories of real teachers, in real classrooms, making real attempts for change, and not always succeeding. It is a book about teachers making a difference in difficult times and tough places. But most importantly, this book reaffirms that being an educator is inherently about adopting socially just practices, building community capacity and contributing to a more socially sustainable world.
