Weaponeering Guide

Overview. Weaponeering is the process of estimating the quantity of a specific type weapon required to achieve a specific level of damage to a given target, considering target vulnerability, weapon effects, munition delivery errors, damage criteria, probability of kill, weapon reliability, etc. It is the third phase in the conceptual targeting process, but it is embedded into target development, force selection, and execution planning.

Weaponeering: Conventional Weapon System Effectiveness

The primary objective of Weaponeering, Third Edition is to assist those engaged in assessing the effects of conventional weapons to understand the components, limitations and techniques needed to perform that assessment. The intent is to explain the underlying methodologies behind various weaponeering tools rather than how to use the tools themselves.

"This guide resulted from an effort to develop a new approach to assessment and diagnostic training feedback in joint training. The guide resulted from a front-end analysis of joint targeting for an air campaign planning simulation. The analysis generated detailed training objectives, measurement instruments, and self-assessment procedures for each objective. For each phase of the joint targeting cycle, inputs, behavioral processes, and products were specified and incorporated in measurement tools. The measures were developmentally applied during Blue Flag 97-1. Blue Flag is a recurring cycle of air campaign

planning exercises, managed by a numbered air force. Lessons learned from the application were combined with comments for Blue Flag participants to produce this joint training guide in its current form."--DTIC.

Weaponeer, is a training device that simulates the live-fire conditions of the M16A1 Rifle. This guide provides specific information on the use of Weaponeer in Basic Rifle Marksmanship Training. The guide is based on information gathered through extensive field observations and informal interviews and summarizes the results of original research designed to provide a better understanding of how Weaponeer should be used in rifle marksmanship training.

This Air Force Doctrine Document (AFDD) establishes doctrinal guidance for planning, executing, and assessing targeting operations. Time and time again in the last several decades, air and space power has proven among the most powerful of weapons in the nation's military arsenal, deciding some conflicts outright and enabling us to resolve others in the manner of our choosing. Today, air and space power can impose decisive effects anywhere on the globe at almost any time, but it has taken more than this global reach to make it the world's premier military instrument. Sound doctrine, strategy, and operational art are also required and the discipline of targeting is a vital piece of Air Force operational art. Guided by sound doctrine and strategy, targeting during conflict enables air and space power to be a decisive force in modern warfare. Targeting processes and principles that

Read PDF Weaponneering Guide

encompass the realms of information and influence can also have decisive effects upon operations other than major combat. This publication describes what targeting is and how it supports the overarching structure of air and space planning, execution, and assessment. The United States military operates according to effects-based principles, which tie planning, execution, and assessment together into an adaptive whole. Accordingly, this publication also shows why and how effects-based thinking is integral to effective targeting today. This document builds upon the foundational doctrine concepts of an effects-based approach established in Air Force Doctrine Document 2, Operations and Organization. Targeting has been a vital part of air and space power since the first weapon was dropped from an aircraft. It has evolved over a century from a matter of primitive guesswork into a discipline based on scientific principles

Read PDF Weaponneering Guide

and robust processes that is used to guide employment of much more than just weapons dropped from airplanes. Targeting will continue to evolve as it assimilates the insights of effects-based operations, improvements in battlespace awareness, and other innovations, but it will always be central to the way the Air Force conducts operations. Contents: Chapter One - Targeting Fundamentals * Chapter Two - Deliberate Targeting * Chapter Three - Dynamic Targeting * Chapter Four - Assessment * Chapter Five - Readiness And Ongoing Responsibilities For Targeting

"In this highly anticipated third edition, Morris R. Driels clearly and comprehensively describes tools and strategies for assessing the effects of conventional weapons. The intent is to explain the underlying methodologies behind various weaponneering tools rather than how to

use the tools themselves. This introductory volume covers the basic subjects that need to be understood to compute weapon effects based on the concept of an effectiveness index (EI). These subjects include weapon delivery accuracy, warhead lethality, and target vulnerability. This approach gives reasonable, rapid results and allows an easier understanding of current methods used to estimate weapon effects"--

Over 5,300 total pages MARINE RECON Reconnaissance units are the commander ' s eyes and ears on the battlefield. They are task organized as a highly trained six man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine Air- Ground Task Force, reconnaissance teams provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team

Read PDF Weaponneering Guide

conduct depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include, but are not limited to: Plan, coordinate, and conduct amphibious-ground reconnaissance and surveillance to observe, identify, and report enemy activity, and collect other information of military significance. Conduct specialized surveying to include: underwater reconnaissance and/or demolitions, beach permeability and topography, routes, bridges, structures, urban/rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized with other forces, equipment or personnel, assist in specialized engineer, radio, and other special

attacking ground targets using air-launched or ground-launched weapons. Air-launched weapons include guided and unguided bombs, air-to-ground missiles, laser-guided bombs, rockets, and guns. Surface engagements cover both direct and indirect fire weapons. The text outlines the various methodologies used in operational products used widely in the U.S. Army, Navy, Air Force, and Marine Corps. It explains the underlying methodologies for the key munitions effectiveness tools, Joint Air-to-Surface Weaponeering Systems (JAWS), and JMEM/SS Weapons Effectiveness Systems.
