Women's Health: Readings On Social, Economic, And ... Ellen Annandale provides a comprehensive and persuasive analysis of the contemporary social relations of gender and women's health, arguing that the once all important sex/gender distinction fosters an undue separation between the social and the biological whereas it is their interaction and flexibility that is important in the production of health and illness.New theoretical tools are needed in a world where the meaning and lived experience of biological sex and of social gender, as well as ...

Women's health : readings on social, economic, and ... Trusted advice and guidance for women focusing on nutrition, health, fitness and inner beauty from Women's Health Magazine UK

In this thoroughly updated second edition, Judith Walzer Leavitt, a leading authority on the history of women's health issues, has collected thirty-five articles representing important scholarship in this once-neglected field. Timely and fascinating, this volume is organized chronologically and then by topic, covering studies of women and health in the colonial and revolutionary periods and the nineteenth century through the Civil War. The remainder of the book concentrates on the late nineteenth and twentieth centuries and addresses such controversial issues as body image and physical fitness, sexuality, fertility, abortion and birth control, childbirth and motherhood, mental illness, women's health care providers (midwives, nurses, physicians), and health reform and public health.

In Seizing the Means of Reproduction, Michelle Murphy's initial focus on the alternative health practices developed by radical feminists in the United States during the 1970s and 1980s opens into a sophisticated analysis of the transnational entanglements of American empire, population control, neoliberalism, and late-twentieth-century feminisms. Murphy concentrates on the technoscientific means—the technologies, practices, protocols, and processes—developed by feminist health activists. She argues that by politicizing the technical details of reproductive health, alternative feminist practices aimed at empowering women were also integral to late-twentieth-century biopolitics. Murphy traces the transnational circulation of cheap, do-it-yourself health interventions, highlighting the uneasy links between economic logics, new forms of racialized governance, U.S. imperialism, family planning, and the rise of NGOs. In the twenty-first century, feminist health projects have followed complex and discomfoting itineraries. The practices and ideologies of alternative health projects have found their way into World Bank guidelines, state policies, and commodified research. While the particular moment of U.S. feminism in the shadow of Cold War and postcolonialism has passed, its dynamics continue to inform the ways that health is governed and politicized today.

Material Discourses of Health and Illness explores the way in which the meaning, context and consequences of bodily phenomena, ranging from sex to heart disease, are created and transformed by human activity. It introduces a range of theoretical perspectives which can contribute to an understanding of the meaning and context of embodied experience, drawing on phenomenology, ecological psychology, post-structuralism and social constructionism. A critical overview of the methods and rationale of qualitative research and discourse analysis is given, and key issues confronting discursive researchers are addressed. These include the status of physical 'reality', the problem of relativism, and the question of how the validity of qualitative research can be established. This book provides practical examples of how these approaches can be applied to the field of health psychology with a collection of sophisticated discursive analyses of health-related topics, ranging from eating behaviour and childbirth to dialysis, deafness and AIDS. Each chapter explains and justifies a different approach, reflecting on its practical utility as well as its limitations.

First multi-year cumulation covers six years: 1965-70.
