"Zoo In The Sky: A Book of Animal Constellations," by Jacqueline Mitton, is a themed book of constellations. It covers a handful of animal-shaped constellations in both the Northern and Southern hemispheres. The illustrations are charming, and accented with silver-foil stars, and the text is short and informative and easily readable.

Zoo in the sky \* Two modern-day stargazers paint pictures in the sky based on the ancient stories surrounding the heavens. From the Great Bear to the Scorpion, Leo the Lion, and other animal constellations, Mitton offers poetic, abbreviated legends of the nighttime sky, while Balit's paintings, highlighted by shimmering silver stars, give visual meaning to the text."

Shows and describes the animal constellations, including Canis Major and Scorpius the Scorpion, and provides information about some of the more unusual stars that make up the constellations. Reprint.

The follow-up to Zoo in the Sky presents facts about stars, nebulas, galaxies, and constellations and recounts the Greek myths that provide widely-known names for ten constellations, from Andromeda to Pegasus. Reprint.

In this lively book, award-winning author-artist Bob Barner takes readers on a ride through outer space to visit distant planets and dazzling stars. The simple rhyming text and colorful torn-paper collage illustrations make this book perfect for the very youngest readers, and the Meet the Planets and Meet the Galaxy sections, both bursting with facts, will engage older readers as well. Stars! Stars! Stars! will rocket aspiring stargazers right out of this world!

Large, double-page illustrations introduce stargazers of all ages to 22 major constellations, among them Aquarius, the water bearer; Orion, the hunter; Gemini, the twins; as well as Canis Major, Taurus, and Leo. Accompanying text relates mythological story behind each constellation's name and identifies its principal stars.

The signs are everywhere. Jory's stepfather, Caleb, says, Red leaves in the springtime. Pages torn from a library book. All the fish in an aquarium facing the same way. A cracked egg with twin yolks. Everywhere and anywhere. And because of them, Jory's life is far from ordinary. He must follow a very specific set of rules: don't trust anyone outside the family, have you work boots at the ready just in case, and always, always watch out for the signs. The end is coming, and they must be prepared. School is Jory's only escape from Caleb's tight grasp, and with the help of new friends, he begins to explore a world beyond his family's desert ranch. As Jory's friendships grow, Caleb notifies Jory's mother and siblings that the time has come for final preparations. They begin an exhausting schedule, digging a shelter where they will live until the disaster is over. But as the hole gets deeper, so does the family's doubt about whether Caleb's prophecy is true. When the stark reality of what it will mean to live underground becomes clear, Jory must choose between living his own life or following behind Caleb, shutting his eyes to the bright world he's just begun to see.

A graphically stunning introduction to constellations for the youngest readers, following the meteoric rise of global bestseller Seeing Stars This stylish, informative board book helps younger children identify six of the most recognizable animal constellations from The Great Bear to the The Southern Fish. Each constellation is introduced as a cluster of stars with its connected-line shape; readers then guess the animal through a series of read-aloud clues. A full animal illustration gatefold reveals the answer, accompanied by extra information about the constellation and its important stars. Perfect for bedtime stargazing! Ages 2-4

From Hercules to Cassiopeia, young stargazers can learn the stories behind 10 great constellations, drawing on both scientific fact and ancient legends. Detailed illustrations and foil blocking make this a beautiful addition to the series.Ages 6 and up

What is the Moon like tonight? Its Turn the pages to see its many enchanting phases - from a horned crescent to the plump-faced Man in the Moon, from the icy crystal ring round the Moon to a dark orange eclipse - watched by Owl, Beaver, Koala, Spider Monkey and other creatures around the globe. The final scene has a surprise in store! Brief science notes make this a perfect introduction to the night sky for very young readers.

This charming exploration of the night sky -- featuring a star finder and glow-in-the-dark stickers -- which has more than a quarter of a million young astronomers enjoying the night sky in countries around the world, is now completely revised and updated. A Child's Introduction to the Night Sky is the perfect introduction to the always fascinating world of astronomy. Children ages eight and up will find out what astronomers have learned (and are still discovering), what astronauts and scientists explore, and what they can find by gazing up into the sky at night. Author Michael Driscoll explains how stars are born, the achievements of the great scientists, the history of space exploration, the story of our solar system, the myths behind the constellations, how to navigate the night sky, and more. Whimsical color illustrations throughout and handy definitions and sidebars help engage younger readers and develop their interest. Also included are a nifty star finder tool and fun glow-in-the-dark stickers.
